Kirkland Lake Gold is a new mid-tier gold producer targeting +500,000 ounces in tier 1 mining jurisdictions of Canada and Australia. The combination of the high-grade Macassa Mine Complex in Ontario and the low-cost Fosterville Gold Mine in the State of Victoria, Australia, will form the production backbone of the Company.

Executive Director, Ontario Prospectors Association

Centennial Anniversary of OPES

The year has started off with some interesting market conditions, including commodity prices that have kept investors watching and guessing.

The Prospectors and mineral explorers of Ontario are moving forward as always with optimism. This optimism is reflected in the various option agreements and exploration success stories reported in the press.

This April, there will be two great exploration events for Ontario explorers, The Ontario Prospectors Exploration Showcase (April 4-6, 2017 in Thunder Bay) and the Northeastern Ontario Mines and Mineral Symposium (April 18-19, 2017 in Timmins). Registration forms and more information can be found at the Ontario Prospectors Association website www.ontarioprospectors.com.

The Ontario Prospectors Exploration Showcase (OPES) is the Ontario event highlighting prospecting, exploration, government collected geological data and available contractors/services. This year’s OPES is titled “Prospecting: Where it all begins!” and will be a Centennial Event. Research has shown that the first “Prospectors and Mining Men” meeting was held in Thunder Bay in 1917! This year, the Thunder Bay based event has been expanded to three days to support the exploration community. The OPES will include a specific Core Shack area (Musselwhite, New Gold, Richmont, Wallbridge, Metals Creek, Premier and NuVision confirmed). The expanded OPES allows for the total number of speakers to be expanded by over a third (Lynda Bloom, Champagne Resources, Transition Metals, Noront, Wabassi and Ontario Geological talks). There will be two awards dinners; Tuesday night, the Northwestern Ontario Prospectors Association (NWOPA) will present the NWOPA Awards and Wednesday night the OPA will present the Ontario Prospectors Award followed by a “Centennial Bash” with live music. If you would like to display or make a presentation please contact the Ontario Prospectors Association!

The Northeastern Ontario Mines and Mineral Symposium (NEOMMS) will be presented in Timmins by the Porcupine Prospectors and Developers Association (with OPA support) at the McIntyre Community Centre. The Symposium will highlight minerals exploration and geological insights from across the Northeast of Ontario. Poster, booth and speaker spots are filling up and already include Ministry presentations, corporate exploration updates and service suppliers. If you would like to display or make a presentation please contact the Porcupine Prospectors and Developers Association (www.porcupineprospectors.com) or the OPA.

The Prospectors and Explorers of Ontario are an optimistic group that has continued to explore and develop projects in Ontario even when the markets were the worst most had seen. The markets have been showing signs of recovery and Ontario explorers are ready to provide projects for exploration. Over the last year we have seen continued interest in industrial minerals and gold! Hopefully with the strengthening of the base metal prices some of these great Ontario targets will also get some attention.

See you in the spring in Thunder Bay and Timmins.
Minister’s Message
Ministry of Northern Development and Mines

Ontario’s Mineral Resources:
A shared path forward

In December 2015, we released Ontario’s renewed Mineral Development Strategy (MDS). It provided a blueprint for the industry’s growth over the next 10 years. With a focus on sustainability and innovation, it will keep our province at the forefront of the global mining economy. Over the last year, we’ve made progress on a number of key MDS priorities.

Ontario is ensuring that we remain a global leader in mining. Our partnerships with the Ontario Prospectors Association (OPA) will help us reach this goal by stimulating mineral exploration in Ontario. We were very pleased to work in partnership with the OPA to introduce the Junior Exploration Assistance Program (JEAP). The province will invest up to $5 million, through the Northern Ontario Heritage Fund Corporation (NOHFC), to support the delivery of the Junior Exploration Assistance Program. JEAP is supporting approximately 50 mineral exploration projects across Ontario.

To further enhance mineral exploration, geologists with the Ontario Geological Survey and the OPA delivered the first Prospecting Training Program course at Lakehead University in Thunder Bay in October 2016. These five-day courses are open to members of the public interested in becoming prospectors. More courses are scheduled to run throughout 2017.

This fall, we proposed changes to the Mining Act that if the legislation passes would allow for a province-wide, online claim registration and integrated land management system to be introduced. This final step toward modernizing the Mining Act will make it easier for all parties in the mineral exploration sector to register and manage claims in Ontario.

Our government continues to invest in the sector, with more than $170 million committed to date to modernization, innovation and abandoned mine rehabilitation. We have also made permanent the Northern Industrial Electricity Rate Program (NIER), with $120 million budgeted annually to help major employers in the North remain competitive.

The Ministry of Northern Development Mine’s Aboriginal Participation Fund is helping Indigenous communities prepare for a stronger role in the mineral exploration sector and realize greater benefits from mining activities in or near their communities. Small mineral exploration companies continue to see improved access to capital with the Ontario Focused Flow-through Share Tax Credit, providing investors in early exploration projects in Ontario with a refundable tax credit of five per cent of eligible expenditures.

Designed to stimulate exploration activity and promote the discovery of the new mines of tomorrow, these programs are part of our government’s plan to strengthen our economic foundation in a way that benefits everyone.

This fall, I hosted a Mining Innovation Summit in Sudbury. By bringing together government, industry, academia, thought leaders, entrepreneurs, as well as research and innovation organizations we provided a forum for the exchange of knowledge and ideas to foster further partnership and innovation.

Our government is deeply committed to ensuring our mineral sector remains competitive and innovative by attracting jobs and investment, increasing mineral discovery rates, and fostering a strong innovation culture.

We look forward to continuing to work in partnership with the OPA in an effort to reach our shared goals.

Michael Gravelle
Minister of Northern Development and Mines

Our partnerships with the Ontario Prospectors Association (OPA) will help us reach this goal by stimulating mineral exploration in Ontario. We were very pleased to work in partnership with the OPA to introduce the Junior Exploration Assistance Program (JEAP). The province will invest up to $5 million, through the Northern Ontario Heritage Fund Corporation (NOHFC), to support the delivery of the Junior Exploration Assistance Program. JEAP is supporting approximately 50 mineral exploration projects across Ontario.

2014 – 456,634 ounces of gold
2015 – 505,558 ounces of gold
2016 – 537,765 ounces of gold
2017 – 575,000 ounces of gold (guidance)

Resources
677,200,000 tonnes at 0.98 g/t containing
21,402,000 ounces of gold (Measured, Indicated and Inferred – Dec 2015)

Opened
2013

Employment
800 employees, 200 contractors

Notes
The company has begun permitting on the West Detour project. The proposed open pit mine will add 1.5 million ounces of gold to its reserves, extend the mine life of Detour by several years and increase employment by 145 jobs by 2021. In 2016, a two phase regional exploration program was conducted near the mine with over 50,000 m of drilling being completed.

Opened
2012

Employment
119 total personnel

Notes
Tahoe Resources Inc. acquired Bell Creek on April 1, 2016 upon the completion of its merger with Lake Shore Gold Corp. In 2016, a shaft deepening project began at Bell Creek that will increase its depth from 290 m to 1,000-1,400 m. The project is expected to be completed in the first half of 2018, adding 40,000 ounces of gold production annually. The project is expected to cost $80 million, with $50 million in expenditures planned for 2017.

Notes
Resources at Black Fox extend to 800 m below surface. Primero is currently exploring the Deep Central Zone, located below the current mine, and the Froome Zone, located 1 km west of the Black Fox open-pit. A production decision for the Froome Zone is expected in early 2017. Work also continues at the companies Grey Fox project, located adjacent to Kirkland Lake Gold’s Hislop Mine.
Notes Porcupine Mines Operations include the Dome Mine, Hoyle Pond Mine, Hollinger Mine, several stockpiles and a mill. Dome mine was expected to close in mid-2016 but a decision to remain open was made because of improved gold prices at the start of 2016. In October 2016, the company announced it would also be pursuing reopening the Dome open pit mine because of improved gold prices. At the company’s Borden Lake project, the company plans to complete a 30,000 tonne bulk sample in 2018 as well as a pre-feasibility study that is currently underway. Commercial production is expected to begin by mid-2019. Borden Lake will be incorporated into Porcupine Mines Operations when it is operational.

Notes Hemlo operates from the Williams Mine area. In 2016, Hemlo received a Canadian Industry Program for Energy Conservation Leadership Award for reducing its greenhouse gas emissions by 24% and reducing energy consumption by 10% between 2013 and 2015. Reductions were achieved by implementing a Ventilation on Demand system and by utilizing geothermal energy to manage underground air temperatures. In 2016, Hemlo Mill processed a 70,000 tonne bulk sample from Harte Gold’s Sugar Zone project.
