Message from the OPA

Ontario Mining & Exploration Directory 2015

Garry Clark

Executive Director, Ontario Prospectors Association

Good Bye 2014

The year of the 2014 will be looked on by most explorers in Ontario as a slow, hard year! The exploration dollars being spent in the Province dropped dramatically but there was still some worthwhile highlights. In Timmins Lakeshore, Gold seems to be getting their deposit figured out with new discoveries being made also, Red Lake Goldcorp pushes forward and Rubicon are still heading to production, Premier Gold is steadily moving the Trans Canada project in Beardmore toward production. New discoveries like Probe Mines, Borden Gold Project emphasize the potential that still is hidden in Ontario.

The Ontario Prospectors Association is helping the Northern Prospectors Association and Northwestern Prospectors Association put on the spring symposia. The Northeastern Mines and Mineral Symposium is March 30 and 31, 2015 at Northern College in Kirkland Lake. The Northwestern Mines and Mineral Symposium is in Thunder Bay is going to be presented at the Valhalla April 8 and 9, 2015. Both shows will feature displays and presentations highlighting exploration companies, government geoscience and corporate suppliers. By the spring, when these Mines and Mineral Symposia are presented let's hope we are into better markets!

It needs to be noted that Ontario is progressing toward claims acquisition by Map Selection. It is critical that all explorationists in Ontario follow the progress of the transition to Map Selection and attend Regional Association meetings that will have updates.

Here's to a great 2015!

Minister's Message

Ministry of Northern Development and Mines

In the past decade, more new mines have opened in Ontario than anywhere else in Canada: the province is home to 43 mines and 10 smelters and refineries.

There are approximately 900 mining supply and service companies which support these industries in Ontario and globally. The supplies and services industry employs more than 40,000 people and has an estimated direct economic impact of \$6.6 billion.

Ontario Leading Mineral Development

January 2015

Ontario is known around the world as a global leader in mining. We are the number one jurisdiction in Canada for mineral production value and exploration spending—with the value of our mineral production last year reaching nearly \$10 billion.

Michael Gravelle
Minister of Northern Development and Mines

While there have been global challenges for investment in mining exploration, Ontario continues to have a thriving mineral exploration and production industry. In the past decade, more new mines have opened in Ontario than anywhere else in Canada: the province is home to 43 mines and 10 smelters and refineries. There are approximately 900 mining supply and service companies which support these industries in Ontario and globally. The supplies and services industry employs more than 40,000 people and has an estimated direct economic impact of \$6.6 billion.

The success of mineral development in Ontario is made possible thanks to the work of mining and prospecting communities who have been a catalyst for creating jobs in Northern Ontario and are contributing to the growth of our economy. Today, work is being done on a number of important discoveries such as the Ring of Fire project as well as more than 30 advanced mineral exploration projects.

It's no secret Ontario's success in mineral development is a result of our strong commitment to innovation and collaboration. We remain dedicated to supporting competitive regulatory and taxation policies and ensuring our approach to mineral development balances the interests of all parties. This includes respecting Aboriginal and treaty rights, private landowners, public health, safety, and the environment.

The future of mining in Ontario is bright. Working together, I am confident our province's mineral resource production will continue to drive investment and growth for generations to come.

Reserves	0.3 million tonnes ore average 1.92% copper, 0.32% nickel, 7.0 g/t platinum group metals and 1.0 g/t gold containing 5,900 tonnes copper, 90 tonnes nickel and 80,000 ounces of total precious metals (footwall deposit probable Dec 2010). Additional reserves are contained in the contact nickel deposit.
Opened	2003
Employment	100
Notes	McCreedy's 2014 nickel production decreased due to the suspension of its nickel mining. McCreedy had been mining on two fronts, nickel from the Intermain Zone, and copper from the 700 Zone. The copper ore continues to be processed at Vale's Clarabelle Mill. Since 2011, McCreedy nickel ore had been processed at Glencore's Strathcona Mill but in Q1 2014, Glencore cancelled its processing agreement with KGHM citing a lack of capacity at the mill.
